

NHCX Hackathon 2026

Submission Guidelines

1. Important Information:

Important dates:

- **Registration Closes:** 20 February
- **Participant ID Communication:** 23 February (via registered email IDs)
- **Final Submission Deadline:** 28 February, 5:00 PM (IST)

Any submissions received after this deadline will not be considered.

Any modification in code, video, README, output files, or PDF after the deadline will lead to immediate rejection from further evaluation.

Points to note:

- A team must make only one submission using the registered email ID. Each team must participate in at least one (1) problem statement, and if participating in multiple problem statements, separate folders must be created as per the naming conventions specified under the Detailed Steps for Submission.
- **Please ensure correct folder and file naming as per the prescribed guidelines.**
- Edit access must be provided to the official email IDs shared in the communication.
- Non-compliance with any of the guidelines will lead to disqualification.
- Please refer to 'Detailed Submission Package Requirements' and ensure your submission package is complete. **Incomplete submissions will not be evaluated.**

Code Freeze Protocol

Prior to submission, participants must finalize their codebase. This “code freeze” ensures that the version being evaluated is clearly identified and can be referenced during subsequent review phases.

2. Comprehensive Submission Package

All participants are required to prepare a complete submission package consisting of:

Problem statement 1-3	● Detailed README in .txt/.docx/.pdf file format ● End-to-end video demonstration ● Complete source code in ZIP format ● Output folder containing the required FHIR-structured .txt/ .json file, along with the corresponding FHIR Mapping Excel file (i.e., mapping
------------------------------	--

	sheet and output bundle generated using the “Download Submission Input Data”)
Problem statement 4-5	• Participants must submit one consolidated deck (maximum 6 slides in PDF format) containing the following sections: ○ Summary: A brief overview of the problem, solution and expected value to be unlocked ○ Business Problem: A clear articulation of specific operational challenge that leads to delays or increased costs in claims processing ○ Approach: A focused explanation of which NHCX/ABDM capabilities are leveraged, how they will be utilised and what new capability this unlocks ○ Business Impact and Value Realisation: A concrete description of how the proposed approach translates into measurable business outcomes. Impacts should be framed in economic or operational terms (cost, time, risk, RoI), even if directional or indicative including modelling where required. ○ Strengthening Levers: Practical recommendations on how the approach can be made even more robust

3. Submission Overview (How the Submission Works)

The complete submission package (video demonstration, README .txt/.docx/.pdf file, source code zip file, and output folder containing FHIR-structured .txt/ .json files and the Mapping Excel) must be delivered to the NHA review team. Please follow the steps below:

Step 1: Receive email with Participant ID & Google Form link

Step 2: Upload required files to Google Drive

- Create Main Folder
- Create Problem Statement Folder
- Upload Required Files Inside Each Problem Statement Folder

Step 3: Provide Edit Access to official email IDs

Step 4: Submit the Google Drive link via the Google Form

All submissions must be made through **Google Drive + Google Form**.

Your submission will be considered complete **only after both** (Drive upload + Form submission) are successfully done.

4. Detailed Steps for Submission

Step 1: Receive email with Participant ID & Google Form link (23 February)

(Common for all problem statements)

On 23 February, all registered participants will receive an official email containing:

- Their **Participant ID**
- The official **Google Form link** for submission
- Official **email IDs** to whom Google Drive access must be provided

Example Email Format:

Hi Team,

Your participant_id is **NHA001**.

Please use the following Google Form link for submission: **[Form Link]**

Kindly provide Edit access to the following email IDs for evaluation:

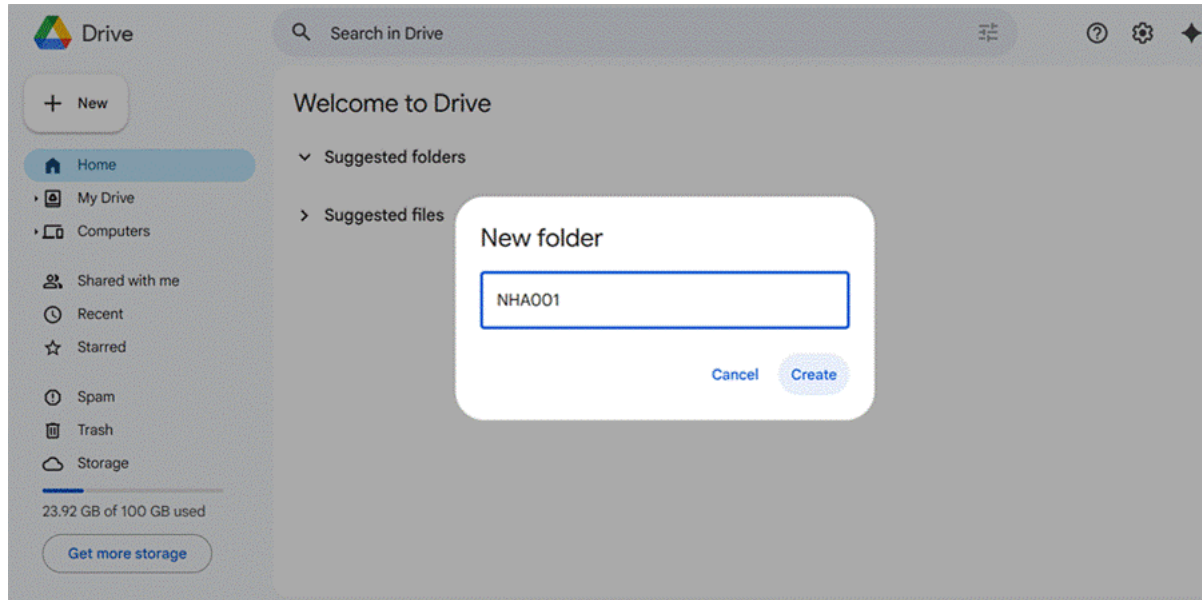

- abc@nha.gov.in
 - xyz@gmail.com
-

Step 2: Upload required files to Google Drive

2.1 Create Main Folder (Mandatory)

(Common for all problem statements)

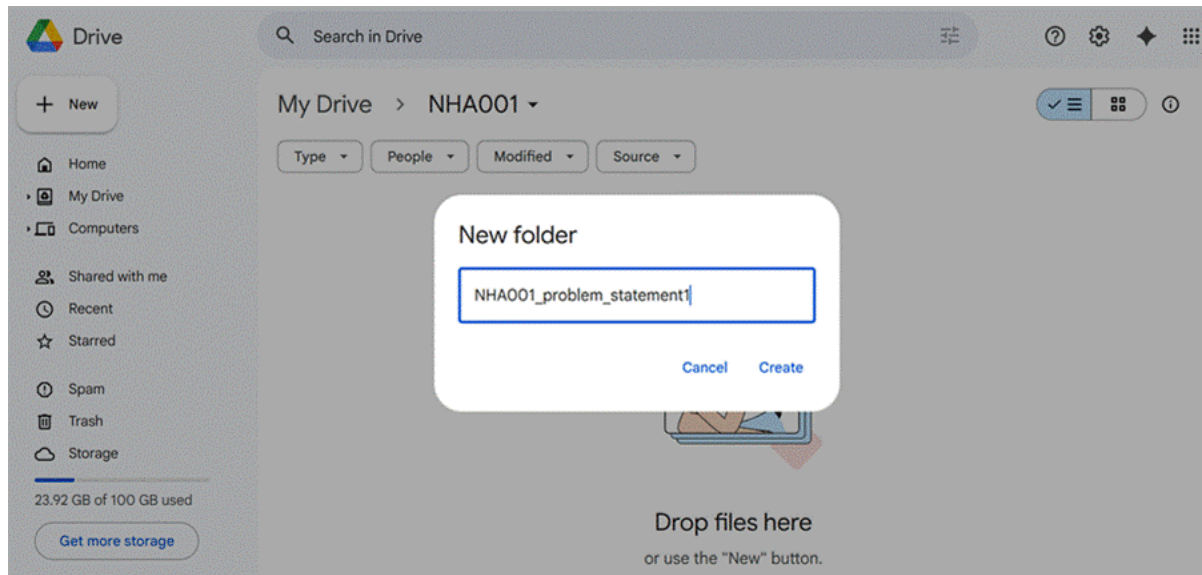

- Incorrect folder naming may lead to rejection.
- Create a main folder in Google Drive using the following naming format:
 - [participant_id]
 - Example: NHA001

2.2 Create Problem Statement Folder(s)

(Common for all problem statements)

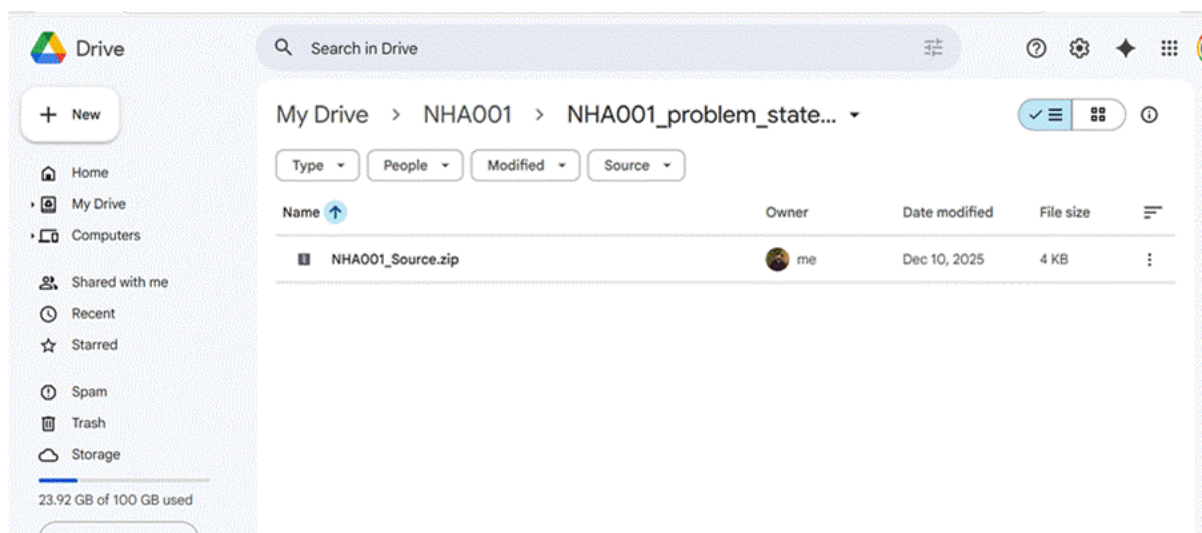

- Inside the main folder, create a separate folder(s) based on the problem statement(s) you are working on.
- Use the following format:
 - [participant_id]_problem_statement[number]
 - Example: NHA001_problem_statement1
NHA001_problem_statement2
- If working on multiple problem statements, create separate folders for each using the same naming convention.

2.3 Upload Required Files Inside Each Problem Statement Folder

For Problem Statements 1, 2, and 3:

- Upload the following files inside the respective problem statement folder:
- **Source Code (ZIP file)**
 - Naming format: [participant_id]_Source.zip

- **README in .txt/.docx/.pdf file**
 - Naming format: [participant_id]_readme

My Drive > NHA001 > NHA001_problem_state...

1 selected

Name	Owner	Date modified	File size
NHA001_Output	me	4:47 PM	—
NHA001_1.mp4	me	Jan 8	65.8 MB
NHA001_2.mp4	me	Jan 8	65.8 MB
NHA001_README.txt	me	5:27 PM	22 bytes
NHA001_Source.zip	me	Dec 10, 2025	4 KB

24.05 GB of 100 GB used

[Get more storage](#)

- **Demo Video (MP4 format)**

- Naming format: [participant_id]_1.mp4
[participant_id]_2.mp4 (if split due to size)

My Drive > NHA001 > NHA001_problem_state...

Search in Drive

Type People Modified Source

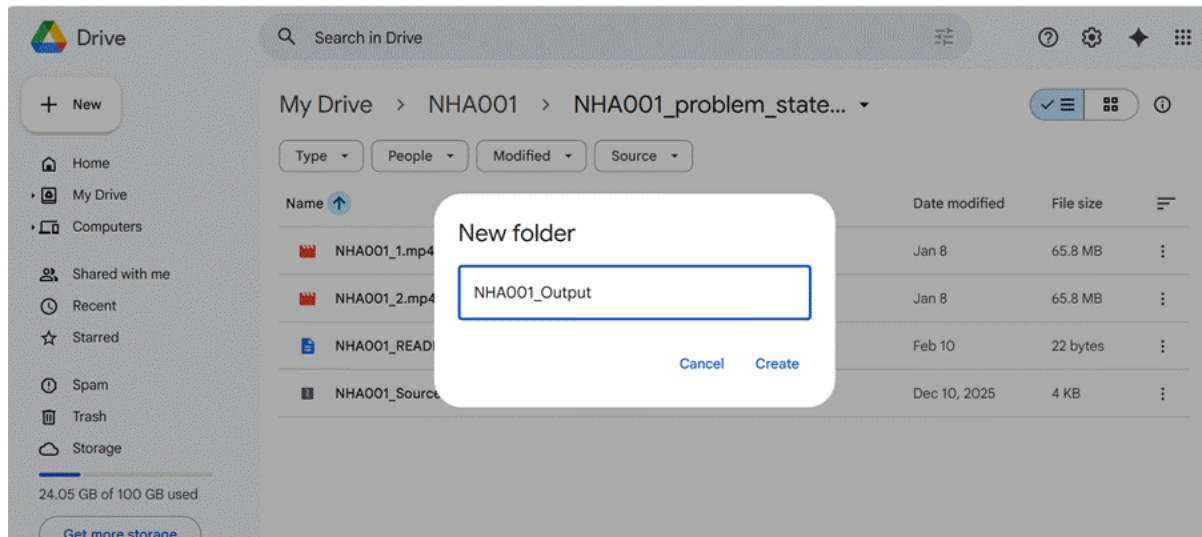

Name	Owner	Date modified	File size
NHA001_1.mp4	me	Jan 8	65.8 MB
NHA001_2.mp4	me	Jan 8	65.8 MB
NHA001_README.md	me	Feb 10	22 bytes
NHA001_Source.zip	me	Dec 10, 2025	4 KB

23.98 GB of 100 GB used

[Get more storage](#)

- **Output Folder containing:**

- FHIR-structured .txt/ .json files
 - FHIR Mapping Excel file
- Naming format: [participant_id]_Output

For Problem Statements 4 and 5:

Naming format: [participant_id].pdf

Participants must submit one consolidated deck (maximum 6 slides in PDF format) containing the following sections:

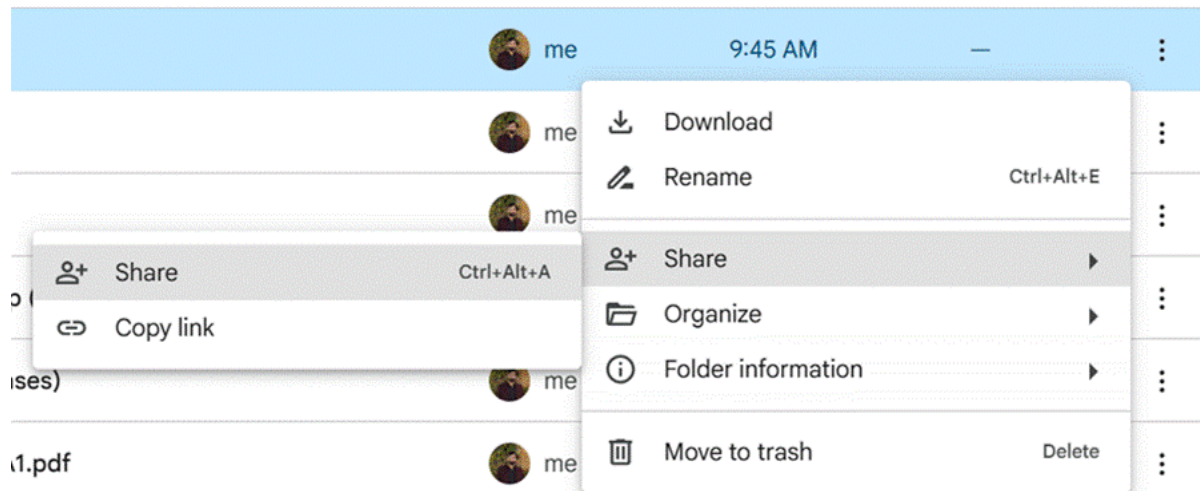

- **Summary:** A brief overview of the problem, solution and expected value to be unlocked
- **Business Problem:** A clear articulation of specific operational challenge that leads to delays or increased costs in claims processing
- **Approach:** A focused explanation of which NHCX/ABDM capabilities are leveraged, how they will be utilised and what new capability this unlocks
- **Business Impact and Value Realisation:** A concrete description of how the proposed approach translates into measurable business outcomes. Impacts should be framed in economic or operational terms (cost, time, risk, RoI), even if directional or indicative including modelling where required.
- **Strengthening Levers:** Practical recommendations on how the approach can be made even more robust

Step 3: Provide Edit Access to official email IDs

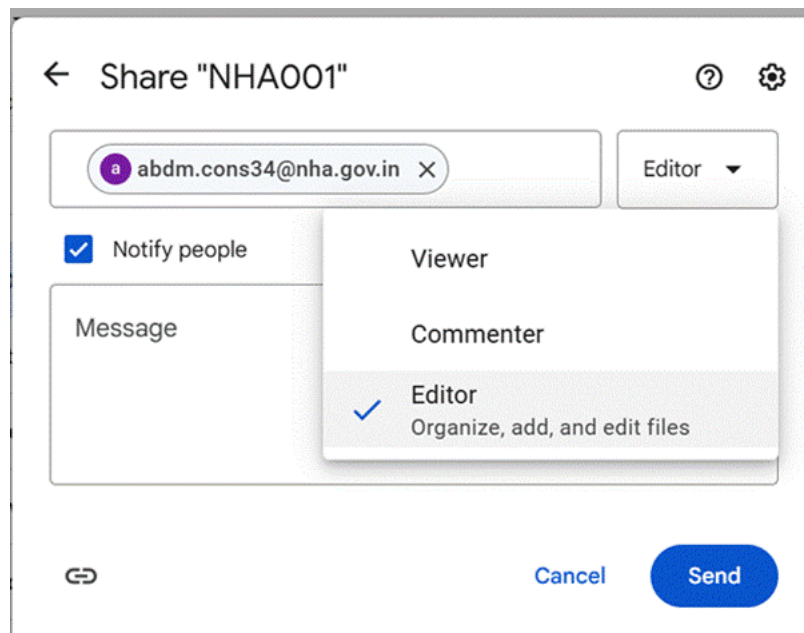

Submissions without Edit access will not be evaluated.

After uploading all files:

1. Right-click the main folder.
2. Click Share.

3. Add the official email IDs provided in the communication.
4. Grant Edit access.

Step 4: Submit the Google Drive link via the Google Form

After completing all Google Drive steps:

1. Copy the Google Drive main folder link.
2. Open the official Google Form link.
3. Fill in:
 - Basic team details
 - Selected Problem Statement(s)
 - Paste your Google Drive folder link (mandatory field)
4. Submit the form.

Your submission will be officially recorded only after submitting the Google Form.

5. Detailed Submission Package Requirements

A. README.txt/.docx/.pdf Requirements

The README must clearly include:

- Brief Functional Scope
- High-Level Architecture
- Tools and Libraries Used
 - Clearly categorized as:
 - Open Source
 - Closed Source
- Setup Instructions
- Dependencies
- Implementation Details

The README should enable evaluators to understand and execute the solution easily.

B. Video Demonstration Requirements

The video must:

- Be a complete end-to-end demonstration
- Clearly showcase:
 - Key features
 - Functional workflow
 - Implementation highlights
- Optional:

- Voice-over explanation
- On-screen annotations

The video must clearly demonstrate that the solution is functional and working.

C. Source Code Requirements

Participants must include:

- A ZIP file of the complete source code, following correct naming conventions
- All scripts, modules, configuration files, and dependencies required to run the solution
- Directory structure that is clean, readable, and logically organized

The code must correspond exactly to the version demonstrated in the video and described in the **README.md** (as per the code freeze protocol).

D. FHIR Bundle and FHIR Mapping Document Requirements

Participants must include:

- Properly structured FHIR Bundle TXT files
- Corresponding FHIR Mapping Excel document
- All files placed inside the output folder using the prescribed naming conventions

These outputs must fully match the test input cases defined in the problem statement.

6. Evaluation Process

The jury will evaluate submissions in two stages:

Stage 1: Initial Screening	The following components will be reviewed: ● Video demonstration ● README.txt/.pdf/.doc ● Source code ● FHIR Bundle (.txt/.json files) ● FHIR Mapping Excel document Based on this review, qualifying participants will be shortlisted.
Stage 2: Live Demonstration	Shortlisted participants will be required to: ● Participate in a live demo in dedicated slot

	• Present their solution directly from their development environment • Walk the jury through the functional workflow and implementation • Demonstrate the service using test data provided (as required) • Answer technical and architectural questions This live evaluation will determine the final assessment.
--	--

Hackathon Authority & Governance Clauses

1. Judging Authority

1.1 The evaluation of all submissions shall be conducted by the duly appointed Jury Panel and/or Organizing Committee.

1.2 The decision of the Organizing Committee and Jury Panel shall be final, binding, and non-contestable in all matters relating to evaluation, scoring, shortlisting, disqualification, and declaration of winners.

1.3 No correspondence, appeal, re-evaluation request, or dispute regarding scores, ranking, or results shall be entertained.

2. Evaluation Criteria & Discretion

2.1 Submissions shall be assessed based on predefined evaluation criteria, which may include but are not limited to:

- Problem understanding
- Technical implementation
- Innovation and creativity
- Code quality and architecture
- Scalability and feasibility
- Documentation and presentation

2.2 The Organizers reserve the right to modify, refine, or apply additional evaluation parameters at their discretion to align with the objectives of the Hackathon.

2.3 The Organizers may apply both qualitative and quantitative assessment methods as deemed appropriate.

3. Technical Execution & Deployment Disclaimer

3.1 The Organizers are not obligated to execute, deploy, debug, or modify any submitted code.

3.2 Submissions that:

- Lack clear execution instructions,
- Do not include required dependency files,
- Fail to run within reasonable effort and time, or
- Are incomplete or improperly packaged

may be disqualified or scored accordingly at the sole discretion of the Organizers.

3.3 It is the sole responsibility of participants to ensure that their submissions are functional, complete, and reproducible.

4. Disqualification

4.1 The Organizers reserve the right to disqualify any participant or team in case of:

- Plagiarism or copied content
- Misrepresentation of authorship
- Use of unauthorized tools or unfair means
- Violation of Hackathon rules or code of conduct

4.2 The decision to disqualify shall be final and binding.

5. Tie-Breaker

5.1 In the event of a tie in scoring, the Jury Panel reserves the right to determine the winner based on additional evaluation parameters or deliberation.

5.2 The tie-breaker decision shall be final and not subject to review.

6. Modification of Rules

6.1 The Organizers reserve the right to amend, modify, suspend, or cancel any aspect of the Hackathon, including rules, timelines, evaluation process, or prize structure, at their sole discretion.

6.2 Any such modification shall not give rise to any claim against the Organizers.

7. Limitation of Liability

7.1 The Organizers shall not be liable for any claims, losses, damages, or disputes arising out of participation, evaluation, technical issues, or results of the Hackathon.

7.2 Participation in the Hackathon constitutes full acceptance of these terms.
